

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFACE

TO THE SECOND EDITION.

FOR a second time we have compiled this work, making a few corrections and many additions. Little need be added to our preface to the first edition. All our most sanguine anticipations have been realized. The first edition is exhausted and a second one is called for; it has proved a great labor-saving work to the lawyer and to the legislator, and the short time it took to dispose of it is a sufficient endorsement of its usefulness.

The arrangement of the present edition is substantially the same as the first. A few deviations have been considered an improvement; namely, "Gas and Water Companies," "Hall and Market Companies" and "Plank Road and Turnpike Road Companies," have been respectively consolidated under those heads, as many of them have corporate powers, to be either or both, whether so expressed in their titles or not.

Two new classes have been established, viz.: "Co-operative Associations" and "Contract Companies." Occasionally some title may be misplaced owing to a want of expression of the object both in the title and in the body of the act, and such will most generally be found among Miscellaneous Associations. In conclusion, we would say we have endeavored to make the work reliable, and to embrace everything within its original design; if, therefore any errors or omissions should be discovered, we trust they may be charged solely to our general human imperfections.

PREFACE

TO THE FIRST EDITION.

IN offering this work to the legal profession, and to the public, the compiler begs leave to say a few words of explanation.

Originally, it was the intention to compile an index to the *private* Acts of Assembly,—the want of such a work having long been felt by the practising lawyer,—but after considerable labor bestowed upon it, this plan was abandoned, as, if not impracticable, at least attended with more labor and expense than profit, for the reasons, that often the difficulty would arise, to distinguish the *private* from the *public* act, the lines of demarcation being sometimes difficult to define; again, the embarrassment of finding an appropriate head under which to place it, requiring an increased number of titles; and lastly, the large amount of legislation upon matters of little or no importance at this day,—yet without which the work would not be complete,—making it so voluminous and at the same time so imperfect, that the labor required would be more than the undertaking would warrant.

Under these circumstances the present plan was adopted, and the work confined—with a few exceptions—to corporations; even this has been found a task more arduous than was at first anticipated.

Although the work is not claimed to be infallible, yet it is believed that this Digest contains a complete list of all corporations, chartered by the legislature of Pennsylvania between the years 1700 and 1866 inclusive, together with many chartered by the courts, and under the mining and manufacturing laws, which required subsequent legislation, and excepting only *cities* and *counties*, and perhaps a few unimportant, obsolete charters.

Three sections, not relating to corporations, have been added,

which it was thought would be of use, viz: I. *Rivers and Creeks*, embracing acts relative to their navigation, jurisdiction and fisheries. II. *Ferry Rights*. III. *Dams*.

Also an Appendix, covering all those acts, authorizing the sale, conveyance, and partition of real estate by individuals, confirmation of titles, &c.,—this is, however, only brought down to the year 1863 inclusive.

As the older pamphlet laws are now becoming rare, the pages and number of the books of the original record are given down to the year 1800, which were taken from *Smith's Laws*; from 1800 to the present time, the paging refers to the Pamphlet Laws. The first act mentioned after the title is generally the act of incorporation, though not always, as in some cases there was preliminary legislation.

To the many friends who have aided me in this undertaking by the loan of their books, and by kind words of encouragement, I return my sincere thanks, and if the fruits of my labors will, to some extent, alleviate those of my brethren, as I flatter myself they may, my object will have been accomplished.
